

## REACH Position Statement: EU Regulation (EC) Number 1907/2006

---

### Background

The Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) is a European Community Regulation related to the safe use and identification of chemicals (Regulation (EC) Number 1907/2006). REACH entered into force on June 1, 2007 with the aim of improving the protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances. REACH was aimed at streamlining and improving former European Union chemical legislation by replacing approximately 40 individual pieces of legislation and harmonizing with the remaining legislation. The new legislative framework under REACH shifts responsibility for the control and safety of chemicals from government authorities to industry and created the European Chemicals Agency to act as a central coordinator.

### Acromag Responsibilities

Acromag is an importer of articles as defined in the Regulation. However, registration requirements under Article 7 of REACH do not currently apply to articles imported by Acromag into the European Union because:

1. Substances are not present in the articles in quantities totaling over one ton per year
2. Substances are not intended to be released under normal or reasonably foreseeable conditions of use.

Acromag is not categorized as a downstream user under REACH because it does not use the substances in the course of its professional activities and therefore has no applicable requirements under Article 37 of REACH. Acromag will continue to monitor REACH developments and will comply with any applicable requirements.

As Substances of Very High Concern (SVHCs) are added to Annex XIV of the Regulation (Authorization List), Acromag will assess whether both of the following conditions are met:

1. The substance is present in the articles in quantities over one (1) ton per year
2. The substances are present in Acromag devices above a concentration level of 0.1% w/w

Acromag shall comply with the requirements of Article 7(2) and Article 33 of the Regulation, as necessary. For informational purposes, Acromag has contacted its material and manufacturing vendors to verify that Acromag devices do not contain SVHCs. (Note that several vendors have not established a REACH compliance statement yet. Acromag is surveying vendors to determine their status and will continue to do so.)
